The **Tech-X Project Exhibition 2025** was successfully conducted on **24th April 2025**, showcasing a vibrant display of innovation, technical skills, and interdisciplinary collaboration. The event witnessed the enthusiastic participation of **over 130 students**, each presenting a wide range of cutting-edge projects.

To ensure quality and originality, all submitted projects underwent an **internal screening process** conducted by the faculty members of I.T. departments. This rigorous evaluation led to the shortlisting of the **best 26 projects**, which were selected based on criteria such as innovation, feasibility, societal impact, technical complexity, and presentation.

The final round of the exhibition was held on **24/04/2025**, where the selected top projects were presented before a panel of **industry experts** from reputed organizations and tech firms. These professionals brought valuable perspectives from current industry practices, making their evaluations particularly insightful for the student participants.

The event served not only as a platform for technical demonstration but also as an opportunity for students to interact with industry leaders, receive constructive feedback, and gain visibility for their ideas. The judging process concluded with the selection of the **top three projects**, which were recognized with awards and certificates for their excellence in innovation and execution.

The **Tech-X Project Exhibition 2025** successfully highlighted the talent, creativity, and engineering acumen of the students. It also reinforced the institute's commitment to promoting practical learning, industry alignment, and innovation-driven education.
