Educational Visit Report

Regional Science Centre, Bhavnagar

Date of Visit: 24/03/2026

Participants: 2nd Semester IT Students (44 Students)

Industry/Educational Hub visit: Regional Science Center, Bhavnagar

Faculty Coordinators: Prof. K. V. Patel, Prof. P. M. Chauhan

Information Technology Department has organized an educational visit to the Regional Science Centre for the students of the second semester. The main purpose of this visit was to provide students with practical knowledge and real-life understanding of various scientific concepts and technological developments.

Such educational visits are an important part of academic learning as they help students connect theoretical knowledge with practical applications. All the students reached the science centre by their own means and assembled at the entrance, where further instructions were given by the faculty members.

Firstly, Students visited to the gallery related to water life. In this section, They observed various types of aquatic animals and fishes. The guide explained in detail how different organisms survive in water, their body structures, and their life processes. This helped us understand the diversity of aquatic life and their adaptations in different environments.

After that, Students moved to the Automobile Gallery. This section displayed various components of vehicles such as engines, mechanical parts, and models of cars. The faculty explained how vehicles were used in earlier times and how advancements in technology have improved their performance and efficiency in modern days. This gallery provided a clear understanding of the development and innovation in automobile engineering.

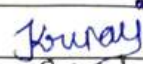

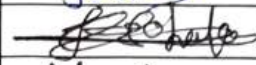

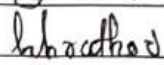

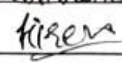

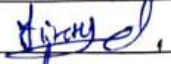

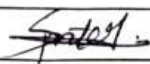

Next, Students visited the gallery related to living and non-living organisms. In this section, students saw skeletons of different animals and birds, as well as ancient creatures like dinosaurs. The exhibits were arranged systematically in different categories, which made it easier to understand classification. A guide explained all the details in a simple and clear manner, helping us to grasp biological concepts effectively.

After exploring the galleries, Students went to a large theatre hall, where they watched an educational video. The video explained the origin and development of the Earth. It showed how the Earth was formed, how life began, and how changes have taken place over millions of years. It also gave insights into possible future changes on Earth. The video was highly informative and enhanced our understanding of planetary science.
