Report on Expert Lecture

Topic: Aptitude and Reasoning

Date: 10/04/2026

Time: 11:00 am onwards

An **Expert Lecture on Aptitude and Reasoning** was organized on **10 April 2026** for the students with the objective of enhancing their aptitude, logical thinking, analytical ability, and problem-solving skills. The lecture was delivered by **Prof. M. U. Ghanchi, Assistant Professor, Electrical Engineering Department**.

The session focused on the importance of aptitude and reasoning skills in academic studies, competitive examinations, placement tests, and professional careers. Prof. Ghanchi explained various approaches and techniques for solving aptitude and reasoning problems effectively. The lecture covered important areas such as **quantitative aptitude, logical reasoning, analytical reasoning, verbal reasoning, problem-solving techniques, and time management**.

During the session, the resource person demonstrated different methods for approaching aptitude questions and emphasized the importance of regular practice, accuracy, and speed. Students were also introduced to useful shortcuts and systematic strategies for solving problems within a limited time. Practical examples and sample questions were discussed to help students better understand the concepts.

The lecture received an enthusiastic response, with **more than 100 students** attending the session. Students actively participated in the interactive discussion and raised queries related to aptitude preparation and reasoning techniques. The session provided valuable guidance and motivation to students for improving their performance in competitive examinations and placement activities.

Overall, the **Expert Lecture on Aptitude and Reasoning** was highly informative and beneficial. The program successfully helped students understand the significance of developing strong analytical and logical reasoning skills. The active participation of the students and the insightful guidance provided by **Prof. M. U. Ghanchi** contributed significantly to the success of the event.

Some Glimpses of the Expert Lecture
