

SHANTILAL SHAH ENGINEERING COLLEGE, BHAVNAGAR
APPLIED MECHANICS DEPARTMENT

Title of Subject : Structural Analysis-II
Subject Code : 2150608
Assignment No : BHS-01
Assignment Title : Influence Line Diagram

Date : 22/09/2020

Q-1: For a two span simple support continuous beam ABC having AB=4m and BC=5m, calculate the ILD ordinates for R_A at every 1m interval.

Q-2: Compute the ordinates of ILD for reaction at A for the figure (2).

Q-3: Five wheel loads as shown in figure (3) crosses a simply supported beam of span 24 m from left to right. Calculate the maximum positive and negative SF at the center of the span and absolute maximum BM anywhere in the span.

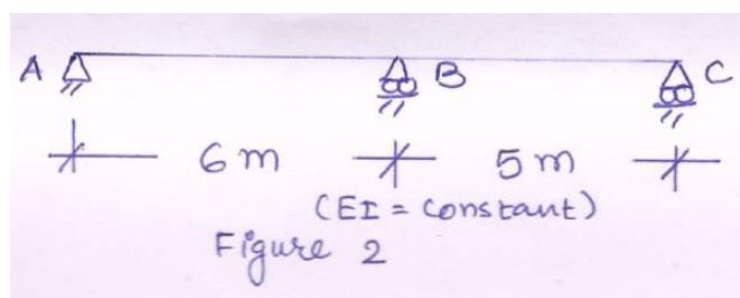

Q-4: Differentiate the influence line diagram for BM at any section and normal BM diagram. Explain this with taking simple example.

Q-5: For a propped cantilever beam AB, fixed at A and having roller support at B, of span 5m, draw ILD for R_B . Calculate ordinates of ILD at every 1m interval.

Q-6: Draw ILD for R_A and M_A for a beam shown in fig.-6

Q-7: Construct Influence Line Diagrams for Reaction (R_A) and Moment (M_A) for a cantilever beam AB fixed at A and having span L.

Q-8: For a simply supported beam AB of span 8m, draw Influence Line Diagrams for Support reactions (R_A and R_B), Shear Force and Bending Moment at a section 2m from left support.
