social interaction between the researcher and the subjects in the manner of
 within. The researcher is characterized by a prolonged period of
 outside and the participant observes who researchers a certain form
 observes who primarily through interviewing subjects a certain form

1) Participant Observation

There are two main methods to participant research:

1) Field Research
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

2) Controlled Research
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

3) Experimental Research
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

4) Survey Research
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

5) Case Study
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

6) Focus Group
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

7) Interview
 involves gathering evidence for organizing insight into other persons,
 taking together all these things, participant field research aims to

Qualitative Research:

Describe the various methods for addressing the research problem from the
